

About EcoDuct Series

Where can EcoDuct be used?

EcoDuct can be used anywhere where insulated ductwork is required – primary supply and return air, FCU discharge/secondary, plant room, risers, external ductwork, etc. EcoDuct is available in any size, shape and colour finish.

Given its clean and neat finishes, some of the best applications of EcoDuct are where the ductwork is exposed and open-to-view, such as in retail or offices.

Another time and cost-efficient application is outdoors, where EcoDuct is supplied with a factory applied weatherproof laminate.

EcoDuct is also very well suited for hostile and/or damp environments – coastal, pool halls, etc and where non-ferrous ductwork is required, such as x-ray labs, etc.
