

About EcoDuct Series

Does EcoDuct have any aesthetic advantages, and can it be used where ductwork is exposed (open-to-view)?

Standard EcoDuct has a very clean and neat finish and has a far better aesthetic than metal ductwork with ductwrap. It is therefore particularly well-suited to applications where the ductwork is exposed and with no false ceilings.

The standard silver foil finish can be enhanced by the addition of any RAL coloured laminate applied to the ductwork, making it a very attractive option.

EcoDuct can also be painted, but this is less beneficial and long lasting.
