

**EcoDuct: innovative, high performance, non-metallic pre-insulated ductwork systems that save energy, cut costs, reduce environmental impact and deliver clean, uncontaminated air.**

## Am I Eligible?

Designed to raise industry standards, EcoDuct assures end users of a consistently high level of installation that supports our systems.

You are eligible if you are an experienced and reliable ductwork installer, committed to quality and willing to embrace new products and processes.

Becoming an Approved EcoDuct Installer is inclusive and open to all qualifying companies installing ductwork.

## Approved EcoDuct Installer

As an Approved EcoDuct Installer, customers are assured of a reliable standard of service and installation.

### What you get:

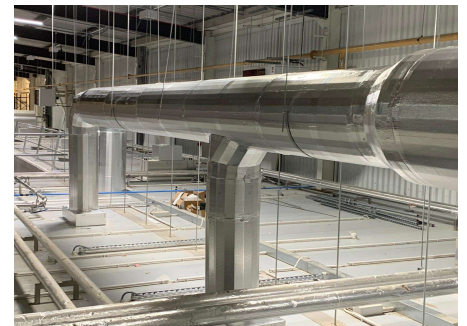

- ✓ Full training and support, including guidance as to hanging systems, etc.
- ✓ Increased sales opportunities and repeat business.
- ✓ Inclusion in our database sent to M&E consultants and contractors.

### What your customer gets:

- ✓ Quality installations - on time and on budget.
- ✓ Confidence in your skills as an approved installer.

### What we expect from you:

- ✓ Quality installations compliant with the EcoDuct Installations Guide.
- ✓ Reliable and professional approach to the customer and M&E Contractor.
- ✓ Identification of opportunities on your projects for the use of EcoDuct.
- ✓ Support for the EcoDuct products on and off site

## Support from EcoDuct
